SUMMARY

Frontend-focused full-stack engineer with 7+ years of experience building scalable web applications using React, TypeScript, Node.js, and Python. Expertise in micro-frontend architectures, performance optimization, and cloud-native systems. Proven track record of delivering high-impact products, leading cross-functional initiatives, mentoring engineers, and driving projects from design to production.

KEY ACHIEVEMENTS

- Delivered 4+ production mobile apps on App Store and Google Play, including HDFC Mobile Banking (**20M+ downloads**).
- Built and shipped products used by **15,000+ insurance professionals**, spanning analytics, risk intelligence, geospatial exposure, and multi-tenant platform capabilities.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python

Databases: MongoDB, Firebase, PostgreSQL, Redis, Neo4j

Tools: VSCode, Cursor, Linear, Jira, Notion, Figma, Rspack, Vite, Rsbuild.

Testing & Monitoring: Playwright, Jest, Bugsnag, Crashlytics, AWS RUM

Frameworks: React, React Native, Next.js, Express.js

Web & API: HTML, CSS, SASS, AJAX, REST, GraphQL, i18n

Libraries: Redux, Zustand, Tailwind, Storybook, Plotly.js

Cloud & DevOps: AWS, GCP, Docker, Jenkins

PROFESSIONAL EXPERIENCE

Harbor AI, Inc. (Insurance marketplace)

Director of Frontend Engineering | USA | July 2024 – present

- Owned frontend architecture for a multi-tenant insurance platform serving 15,000+ insurance professionals, designing a React micro-frontend system (Rspack/Module Federation) deployable as standalone applications or integrated within a full app-shell - giving clients flexible integration options across different technical environments.
- Designed and built full-stack architecture (Flask, MongoDB, Neo4j, Redis) powering real-time underwriter/broker analytics and a geospatial exposure engine correlating policy portfolios with NOAA, USGS, and FEMA hazard data - directly informing underwriting and portfolio decisions.
- Built frontend observability and infrastructure end-to-end: integrated AWS RUM for performance/error monitoring and shipped the company's Next.js public site on AWS S3/CloudFront, boosting performance, reliability, and SEO.
- Drove client-facing technical delivery - partnering with enterprise insurance clients on solution demos and scoping - while setting engineering standards and mentoring engineers to raise code quality and accelerate delivery.

Designare Solutions Pvt Ltd

Senior Developer | Remote, USA | Nov 2022 - Oct 2023

- Led development of a geospatial network management platform for AT&T and Bell Mobility using IQGeo, supporting 30,000+ users through distributed microservices and React-based applications.
- Directed frontend delivery with React.js, Redux, and Ant Design, backed by Jenkins CI/CD pipelines and Crashlytics/Bugsnag monitoring for release reliability.
- Optimized backend PostgreSQL operations - production scripts, stored procedures, and performance-tuned queries — while resolving Jenkins build issues and driving Agile delivery via Jira.

Biz4Solutions Pvt Ltd (Primary client: HDFC Bank)

Senior Programmer | India | May 2021 – Aug 2022

- Built a WCAG-compliant UI library and mobile app screens for HDFC Mobile Banking, cutting UI development time by 30% and debugging by 18% (BugSnag metrics); the app went on to rank #1 on the Apple App Store and Google Play in India.
- Optimized performance and security with R8, Hermes, tree shaking, and lazy loading - reducing app size 40%, improving load time 30%, and boosting engagement 20%; integrated OCR bill pay, geolocation listings, and MFA security to enhance usability and trust.
- Delivered 3+ React and React Native releases in a fast-paced agile environment, accelerating time-to-market by 6 months.

Accenture

Application Development Associate | India | Oct 2018 – Nov 2020

- Enhanced Shell Lubricants' user experience by developing interactive, scalable dashboards with React.js, AJAX, and Chart.js, while ensuring high code quality with Mocha, and SonarQube.
- Engineered RESTful APIs in Node.js with Express, integrated with Oracle Database Cloud Service, and implemented GraphQL for flexible querying, with cross-browser reliability validated through BrowserStack.

EDUCATION

- Master of Science, Computer Science** (Special Distinction - 4.0 GPA)
California State University, Los Angeles

USA | Aug 2022 – May 2024

- Bachelor of Engineering, Computer Engineering**
Savitribai Phule Pune University

India | Aug 2014 – May 2018
